Pediatric & Adolescent Update 2012

March 2, 8:00 a.m. - 5:00 p.m.

COURSE DESCRIPTION:

This full-day Friday conference is designed to provide an update on current topics in pediatrics and adolescent medicine. Ample time is allotted for participant interaction within each didactic presentation.

Optional Thursday evening or Saturday morning hands-on high-fidelity simulation training is available (first-come, first serve basis) on infant/pediatric resuscitation scenarios and emergency procedures.

Learning objectives:

- Identify methods to address sexual risk-taking behaviors with teens
- Describe how to evaluate and treat depression and attention deficit disorder
- Discuss the basic principles, "spirit" and methods of motivational interviewing to help patients reduce behavioral risks and improve treatment adherence
- Describe two intervention strategies to motivate resistant patients to engage in behavioral change, whether for substance use, obesity, exercise, medication adherence or other health issues
- Review human papillomavirus infection, immunizations and tips on how to improve acceptance of HPV and other important immunizations
- Identify methods to support mothers with breastfeeding and optimize feeding supports
- Identify clinical guidelines and management techniques for pediatric/adolescent upper respiratory disease

Optional Simulation Training: designed to improve competencies in handling emergency situations: airway management, intraosseous fluid administration, chest tube placement and emergency deliveries
