## Seminar: Cardiology Update 2009 October 16, 8:00 a.m. - 5:00 p.m.

### COURSE DESCRIPTION:

Designed for physicians diagnosing and treating cardiovascular diseases, this conference will provide updated information directly applicable to practice. This conference is of special interest to physicians, physician assistants, and nurse practitioners with a desire to keep current with recent developments in cardiology.

This full-day conference features short "clinical pearls" focused on the most recent diagnostic and therapeutic advances in clinical cardiology.

*At the conclusion of this conference, participants should be able to:*

This seminar is designed to help physicians and other health care providers better treat pain in our patients by learning to:

- Review evidence-based management decisions in interventional cardiology
- Define clinical approach to patients with hypertrophic cardiomyopathy
- Describe new therapy options in peripheral vascular disease
- Summarize advances in coronary artery disease
- Identify abnormal ECG rates, rhythms and patterns
- Illustrate the application of advanced cardiac imaging modalities
- Describe advances in preventive cardiology specific to lipid management
- Summarize current controversies in cardiology
