Women's Health Update 2011 Seminar

March 4, 7:45 a.m. - 5:00 p.m.

COURSE DESCRIPTION:

This full-day conference is designed to provide an update on current issues in women's health. Emphasis will be placed on the practical application of evidence-based presentations. In addition to didactic lectures, ample time has been allotted for participant feedback and interaction.

Learning objectives:

- Identify key issues related to gender differences in physician and patient communications, including basic strategies to improve outcomes
- Describe current guidelines for HPV, Pap Testing and Breast Screening
- List current trends in therapies for menopausal symptoms/HRT, Pelvic Prolapse, Dyspareunias and Osteoporosis
- Describe approaches to more effective management of lesbian and transgender health care
- Discuss practical approaches to genetic coagulopathies
- Review current evaluation and treatment approaches to PCOS
- Discuss new contraceptive options
- Describe current treatment strategies for eating disorders and OCD
